

PRESS ADVISORY
5G National Day of Action

Who: Wisconsin For Safe Technology (www.WisconsinSafeTech.com)

What: A peaceful sidewalk rally by concerned citizens in front of the U.S. Cellular retail store.

Where: 5275 South 76th Street, Greendale, Wisconsin 53129

When: Wednesday, May 15, 2019 - 12:00 to 1:30 p.m.

Why: We are calling on wireless companies (not just U.S. Cellular, but AT&T, Verizon, T-Mobile, Sprint) to voluntarily stop their deployment of small cell wireless antennas in close proximity to homes and apartments until their technology can be proven biologically safe for everyone.

Background: [Thousands of scientific studies](#) have shown that long-term exposure to wireless microwave radiation causes biological harm, overwhelming the body's biological, chemical and electrical systems, and creating an opportunity for serious medical issues ranging including neurological problems and cognitive deficits to microwave sickness and cancer. **Children are more vulnerable to these effects, as their physiology is still developing.**

Our children have a right to play in their yards and sleep in their beds without being subject to constant 24/7 involuntary exposure to microwave radiation that could harm their health, and we have an obligation to protect them.

All citizens including parents and their children are invited to join us in this peaceful rally to protect public health.

For information, please call Elaine at 414-423-6292 (landline) or at wisconsinforsafetech@gmail.com. Thank you!
